- Virtualisation: Citrix XenServer, VMware and Microsoft Hyper-V.
- Monitoring & IT Management: Nagios, Centreon, GLPI and OCS.
- Scripting & Programming: Python, PowerShell, Bash, C, Java and SQL.
- Databases & Web Technologies: MySQL, SQL Server, DBMS, Merise, IIS, Apache and EasyPHP.
- Security & Network Tools: Nmap, IPtraf, Ettercap, Responder, John the Ripper, Netdiscover, Wireshark and Hydra.
- Backup & Deployment: RAID, fault tolerance, backup and restore, workstation deployment and software configuration.
- Professional Skills: Customer service, communication, analytical thinking, problem-solving, teamwork, organisation, decision-making and time management.

Professional Experience

October 2021 – present | IT Helpdesk Support Assistant, SAINSBURY'S

- Administered and maintained local area networks (LANs), including hardware installation, workstation configuration and network troubleshooting.
- Managed Microsoft Active Directory, including user account creation, modification, deletion and access administration.
- Installed, configured and maintained Debian Linux servers, ensuring reliable system operation and network connectivity.
- Deployed and configured Nagios and Centreon monitoring solutions to monitor server availability, performance and infrastructure health.
- Implemented Linux server security measures using Netfilter and iptables to configure firewall rules and control network traffic.
- Installed, configured and administered Citrix XenServer virtualisation environments, supporting virtual machine deployment and management.
- Installed, configured and supported Windows client operating systems, including software installation, system configuration and troubleshooting.
- Delivered technical helpdesk support and remote troubleshooting using OpenVPN to establish secure connections to client environments.

March 2019 – January 2020 | IT Helpdesk Support, 24HLOGISTICS

- Creation of users accounts for specific software.
- Call and send messages to customers to build loyalty.
- Prepare the daily report for air shipments.

September 2012 – December 2018| IT Manager, The World Wildlife Fund (France)

- Administered local area networks and supported the installation, configuration and maintenance of physical and virtual workstations and servers.
- Managed Active Directory and Windows Server environments, including user account provisioning, modification, removal and access administration.
- Deployed, configured and maintained Citrix XenServer, VMware and Hyper-V virtualisation platforms, alongside Windows Server, Debian and Ubuntu systems.
- Monitored server availability and infrastructure performance using Nagios and Centreon, supporting incident investigation and troubleshooting.
- Installed and configured VoIP telephones and Windows client systems, providing technical support to end users.
- Managed IT support requests through GLPI, providing helpdesk assistance and remote troubleshooting.
- Coordinated IT hardware and software procurement, mobile and fixed-line services, and fibre connectivity contracts.
- Installed, configured and backed up SAGE accounting software, and administered Google Workspace services.

Education and Certifications

2024-25 | MSc Artificial Intelligence Postgraduate - London Metropolitan University
2021-24 | BSc (Hons) Computer Networking and Cyber Security- London Metropolitan University

2022-24 | CCNAv7: Enterprise Networking, Security and Automation – Cisco Networking Academy
2019-20 | (ESOL) English for Speakers of Other Languages (Ent 3)- Westminster King's Way College

Practical Networking Experience

- Linux: Debian, Ubuntu. Knowledge of FreeBSD, Kali Linux
- Installation and configuration of DHCP, DNS Bind9, LDAP, Samba, OpenSsh-server on Debian.
- Implementation of GLPI and OCS for IT management.
- Implementation of Nagios and Centreon monitoring.
- Microsoft: Server family
- Mac: family client landline, laptops, tablets
- Establishment of a Windows server and a relay DHCP, DNS and multi-hosts with NAT routing.
- Establishment of DHCP.DNS.HTTP.FTP network services.
- Administrator of user accounts under AD with scripting Backup and restore
- Mass deployment of 10 clients by RIS (in 2012).
- Establishing RAID + Fault Tolerance Backing Up User Folders on a 2012 Server
- Routing with Frame Analyser on Windows.
- Resource Management, Roaming Profile, Quota Redirection, and DFS.
- Repackaging and deploying MSI packages by Group Policy with Scripting.
